INSTALLATION INSTRUCTIONS

THANK YOU FOR CHOOSING KALLISTA

We appreciate your commitment to Kallista quality products. Please take a moment to review this manual before you install your Kallista product. If you encounter any installation or performance problems, please do not hesitate to contact us at the phone number listed at the bottom of the page.

BEFORE YOU BEGIN

- The appearance of your product may differ from the illustrations shown in these instructions, however, the installation procedure is the same.
- Shut off the main water supply.
- Observe all local plumbing codes.
- Carefully inspect waste and supply tubing for any sign of damage. Replace if necessary.
- For new installations, install the faucet before installing the lavatory.

TOOLS AND MATERIALS

Adjustable
Wrench

Thread
Sealant

Plumbers
Putty

Silicone Sealant

1. DRAIN INSTALLATION

- Disassemble the stopper (if applicable) and the flange from the drain body.
- Apply a small bead of putty or sealant to the bottom of the flange. Insert the flange into the drain opening. Ensure the gasket is inside the flange.

For grid drains only:

- From the underside of the lavatory thread the drain body onto the flange assembly. Tighten firmly.

For stopper drains only:

- From the underside of the lavatory thread the drain body onto the flange assembly. Tighten firmly.
- Install the stopper and tighten firmly.
- Turn the drain body so that the word KALLISTA on the stopper is straight.

For all models:

- Tighten the drain body nut firmly while holding the drain body to maintain the stopper position.
- Using a damp cloth, remove any excess putty or sealant.
- Ensure that the tailpiece is tightly threaded and connect the trap.
